Controls For Any
Dust Collector.*

FARR

Air Pollution Control

870-933-8048 • Jonesboro, AR • email: filterman@farrapc.com

Features & Benefits

- Cleans filters only when they are dirty, thus saving compressed air, which lowers energy costs, and thus the filters last longer which means fewer change outs and less time messing with the dust collector.
- Also, pulsing only when it needs it, resulting in less dust passing through the filters which means lower emissions.
- Graphic display makes it easier for the end user to understand.

Offline Cleaning Input
From Fan Shutdown

Pulse Cleaning Timer Controller
with 10 Solenoid Outputs

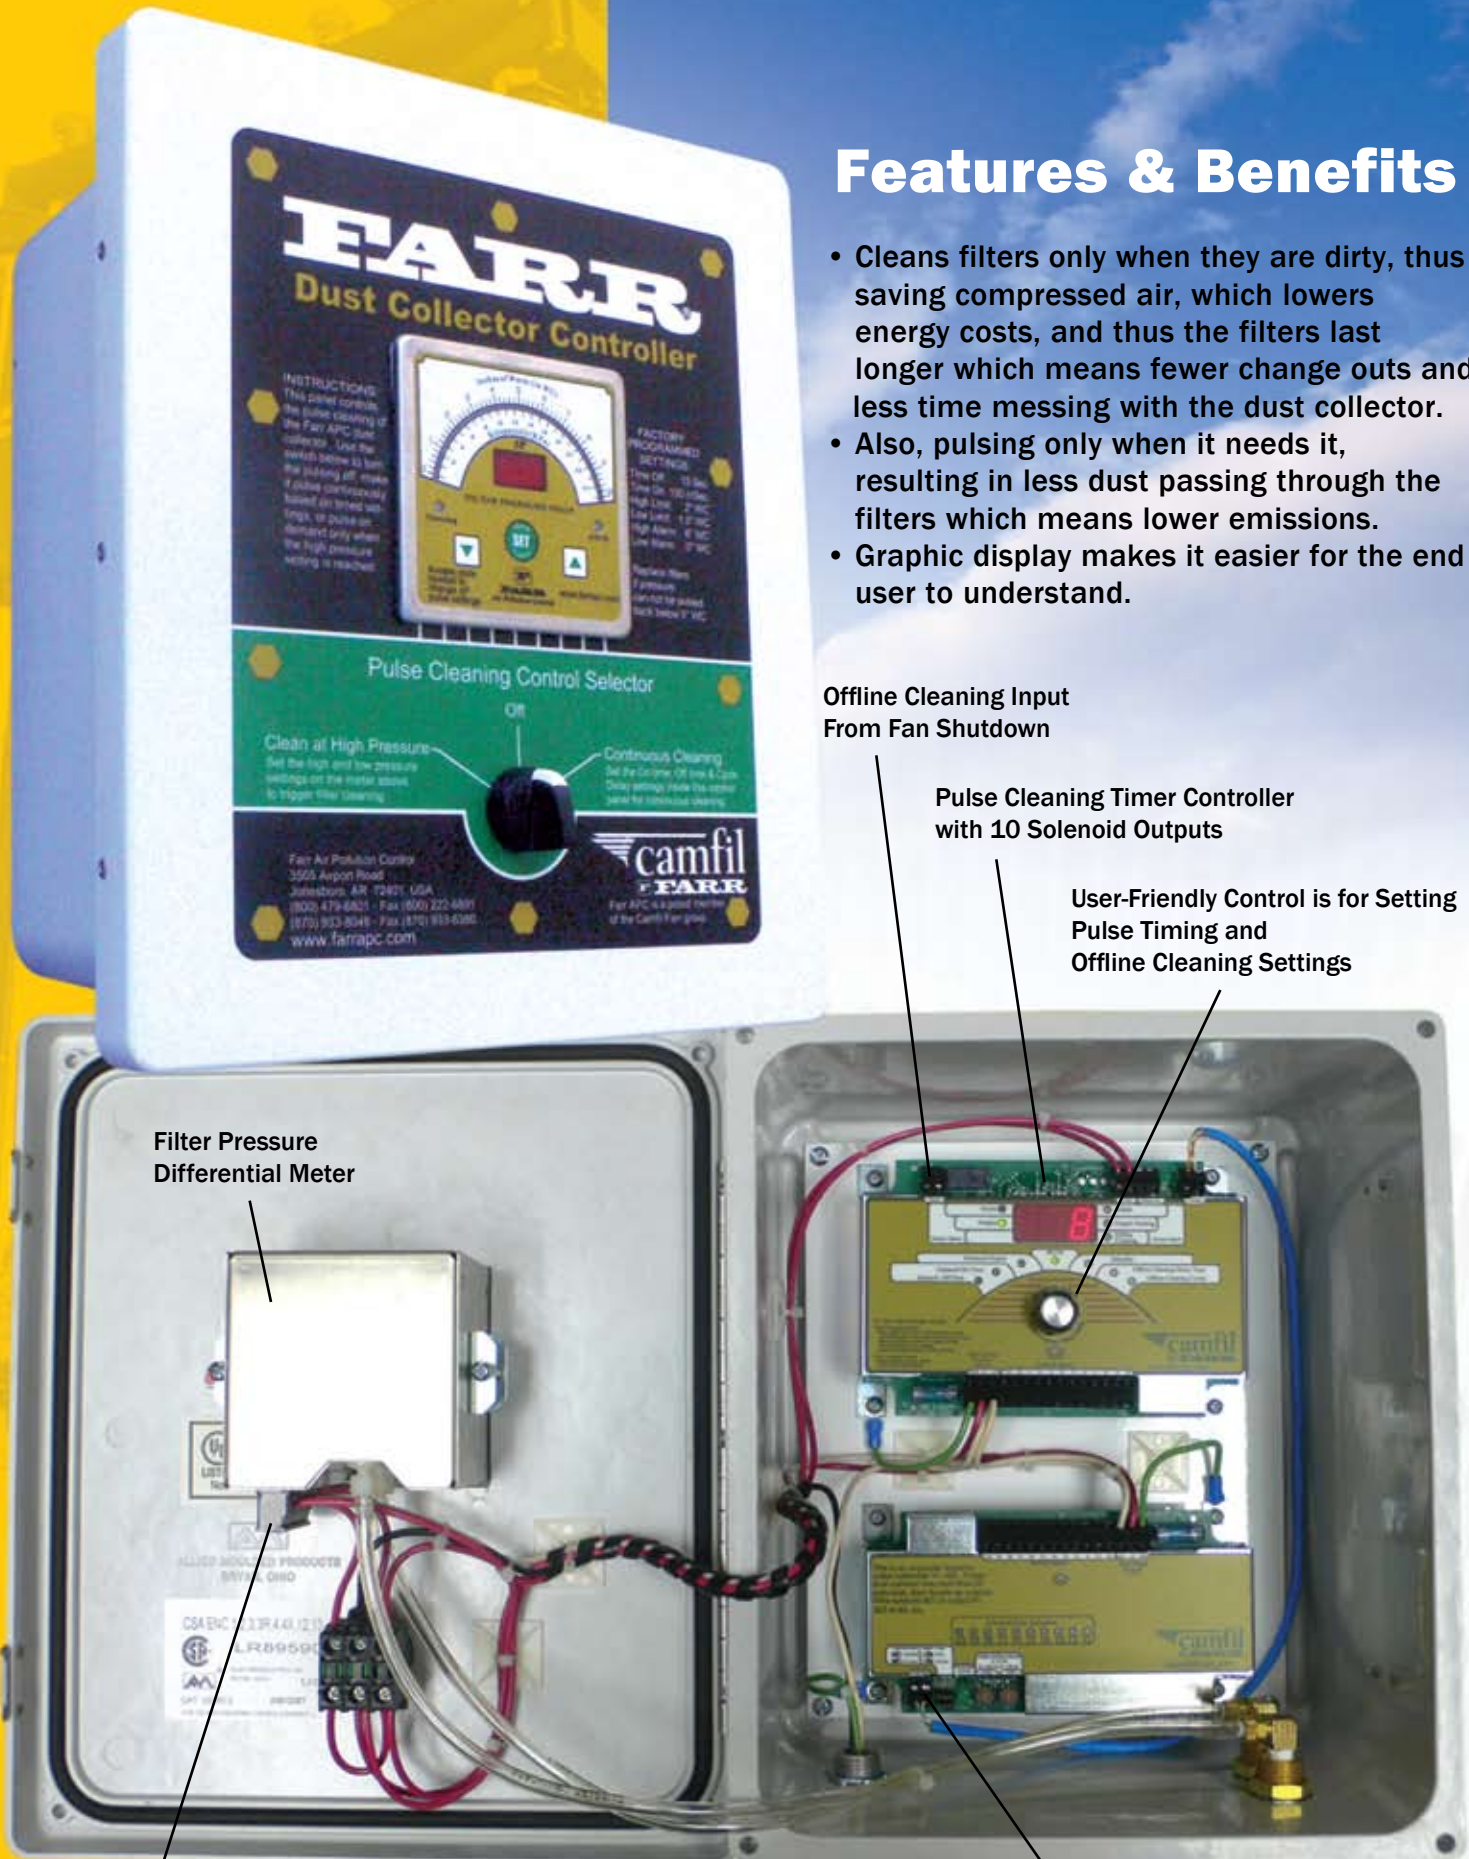

User-Friendly Control is for Setting
Pulse Timing and
Offline Cleaning Settings

Filter Pressure
Differential Meter

Pressure Outputs

- 4-20 mA signal
- Cleaning activation
- Alarm output for dirty filters
- Password protected setting is adjustable from front of panel

Expander Board for Additional 10
Solenoid Outputs

Ships ready to install!
Fittings and airlines included.

Features Continued

- NEMA 4X enclosure
- Clear, permanent user instructions right on the box
- Controls pulse based on filter pressure differential so filters get cleaned only when needed, saving compressed air (energy) and extending filter life
- UL tested and listed
- CE tested and listed
- 110/220V, 50/60Hz, 1 phase power required
- **External Outputs:** High pressure alarm and 4-20 mA signal for liner pressure readout.
