AIR POLLUTION CONTROL

# Cleaning up the workplace, for today...and tomorrow.

Saving energy and increasing production efficiency while controlling indoor air quality is a challenging aspect of plant management. Dust collectors—whether used for pollution control or product recovery—can impact all these areas. Camfil Farr APC can help solve your dust problems.

## Getting Greener

Camfil Farr adheres to the values and principles of sustainable development and has established an organization to develop and maintain sustainable business practices. Here I would like to mention our new initiative for sustainability, "Camfilcaring", which is basically a way of packaging all our industry-leading green initiatives into a comprehensive program that we are launching globally within Camfil Farr.

We believe firmly in being a sustainable supplier. We also believe it will be a requirement for the future. We aim to be the best in sustainability. It will not require a major effort – green is in our genes.

Alan O'Connell

President and CEO  
Camfil Farr

## Mission Statement

- We will clean dust and fumes from factories, making them safer and more productive.
- We will ship collectors fast while still giving the customer what they want.
- We will be the most customer and rep friendly company in the air pollution control business.
- We will make the best dust collector in the business from an end user operation and maintenance viewpoint.

## Green Your Factory

Our goal at Camfil Farr APC is to be green, starting with the environmental benefits of our products. We help our customers go green by stopping thousands of different pollutants from entering the workspace air and the outside air. We also build our equipment to last, so less waste is created over time. Our HemiPleat technology has revolutionized the air pollution control industry by delivering very high efficiency in a filter that lasts twice as long as competitive products. It contributes to sustainability while saving energy. Even the paint on our Gold Series collectors is green, and not just the color: We use an environmentally friendly powder painting process so no VOCs are emitted. Furthermore, premium efficiency motors are standard on the fans we supply. We are constantly launching green initiatives.

We look forward to working with you to "green" your factory.

Lee Morgan

President  
Camfil Farr Air Pollution Control

## Gold Series® Collectors Come With a 12 Year Warranty

Camfil Farr APC guarantees our dust collectors to meet applicable local, state and federal emission control standards. Whether exhausting outside (EPA compliance) or recirculating (OSHA compliance), Camfil Farr APC can solve your dust problems.

The HemiPleat® will improve the performance of any cartridge dust collector...**guaranteed.**

Power up your dust collector with HemiPleat! This statement comes from the fact that with lower pressure drop HemiPleat filters, you can pull more air with less energy, thus capturing pollutants better. Filtration efficiencies exceed 99.99% at 0.5 micron size particles. The air coming out of a Gold Series dust collector with HemiPleat filters has been tested to exceed the air quality required in most hospital operating rooms!

## Gold Cone Filter

The patented Gold Cone filter has allowed many facilities to reduce the number of filters they have to use and change. The innovative cone of filter media expands the usable area of the filter allowing a reduction in the number of filters by at least a third. The design has also led to long filter life with low pressure drop.

The ultimate in a green filter! The DuraPleat is fully washable and reusable. We have customers that have 5-year-old DuraPleat filters and counting. This all synthetic filter handles the most rigorous applications and temperatures.

Looks Like a Safe Because It's Built Like a Safe
